

# VALUE PROPOSITION

# HYGIENIC, FLEXIBLE, LOW TOTAL COST OF OWNERSHIP

SideDrive Conveyor Co. offers the most hygienic spiral conveyors in the World. These spiral solutions are designed to improve food safety & recall concerns, sanitation expectations and operation productivity.

Our **hygienic** design allows for ease of sanitation by eliminating harborage areas to clean to [ensure food safety](#).

**The advantages** are obvious. Our open frame design allows an unsurpassed ability to clean with great access to see and perform sanitation.

[LEARN MORE](#)

Our design has **50% less surface area** compared to drum spirals and 32% less vs other edge driven designs.

[LEARN MORE](#)

Our design has **97% less harborage** locations to allow contamination, compared to a drum driven spiral and 93% less compared to other spiral designs on the market.

[LEARN MORE](#)

Our **Flexible** design allows creative [solutions to optimize layouts](#) for new and existing facilities. We can design to your specific needs.

**Low Total Cost of Ownership** – Low maintenance, quick cleaning, low water and sewage drive lowest total cost of ownership of spirals and drive towards sustainability goals.

[LEARN MORE](#)

**Labor Savings** Less time to clean, less time to maintain. Cleaning along drives [45% labor savings](#) for a typical spiral – 24" wide of 400'.

**Low Maintenance** – No drums, no large drum bearings, no take complex take-ups. Result estimates could [save ~\\$80,000](#).

**Water and Sewage Savings** Reduces the [amount of water used during sanitation](#) due to surface area reduction. Result estimates could save [~334,000 gallons](#) per year per spiral.
